

1 Open attribute table

2 Select features

Table

WA Coast - Smoothed

FID	Shape	TYPE	SOURCE
0	Polygon	Mainland	Landgate TGDB
1	Polygon	Island	Landgate TGDB
2	Polygon	Island	Landgate TGDB
3	Polygon	Island	Landgate TGDB
4	Polygon	Island	Landgate TGDB
5	Polygon	Island	Landgate TGDB
6	Polygon	Island	Landgate TGDB
7	Polygon	Island	Landgate TGDB
8	Polygon	Island	Landgate TGDB
9	Polygon	Island	Landgate TGDB
10	Polygon	Island	Landgate TGDB
11	Polygon	Island	Landgate TGDB
12	Polygon	Island	Landgate TGDB
13	Polygon	Island	Landgate TGDB
14	Polygon	Island	Landgate TGDB
15	Polygon	Island	Landgate TGDB
16	Polygon	Island	Landgate TGDB
17	Polygon	Island	Landgate TGDB
18	Polygon	Island	Landgate TGDB
19	Polygon	Island	Landgate TGDB
20	Polygon	Island	Landgate TGDB

3 Switch to show Selected Features Only:

Table

WA Coast - Smoothed

FID	Shape	TYPE	SOURCE
9	Polygon	Island	Landgate TGDB
10	Polygon	Island	Landgate TGDB
11	Polygon	Island	Landgate TGDB
12	Polygon	Island	Landgate TGDB
13	Polygon	Island	Landgate TGDB
14	Polygon	Island	Landgate TGDB
15	Polygon	Island	Landgate TGDB
16	Polygon	Island	Landgate TGDB

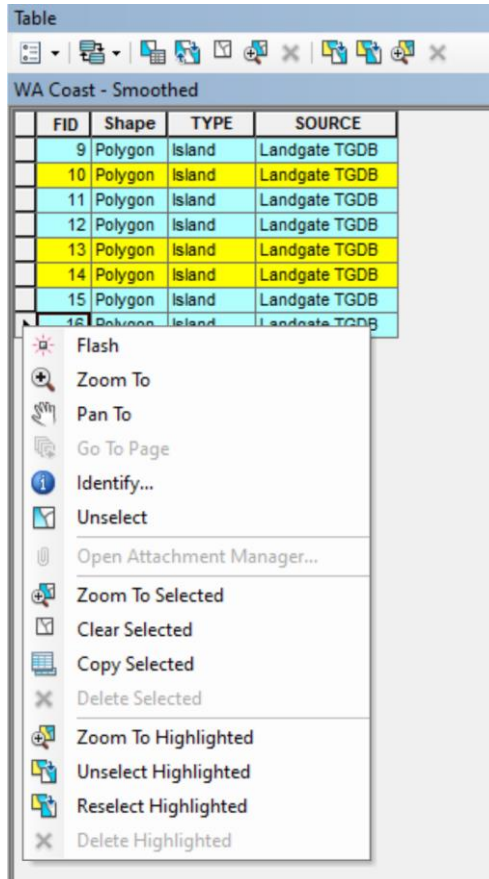

4 Select subset by clicking in grey cells to the left of rows of interest:

Table

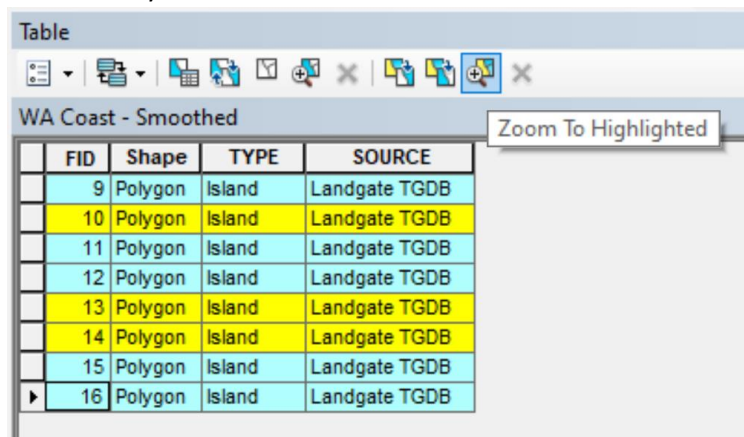

WA Coast - Smoothed

FID	Shape	TYPE	SOURCE
9	Polygon	Island	Landgate TGDB
10	Polygon	Island	Landgate TGDB
11	Polygon	Island	Landgate TGDB
12	Polygon	Island	Landgate TGDB
13	Polygon	Island	Landgate TGDB
14	Polygon	Island	Landgate TGDB
15	Polygon	Island	Landgate TGDB
16	Polygon	Island	Landgate TGDB

5 Right click in grey cell to the left of any row to open context menu:

Alternatively the icons in the toolbar can be used:

- 6 Clear highlighted features by clicking in grey cell at left of top (column headings) row
- 7 Unselect Highlighted (remove from selection), Reselect Highlighted (change selection to be only the highlighted features) and Delete Highlighted (when in edit mode) would also be useful and replicate the full set of highlight tools in ArcMap.
